ABOUT ME

Hello, my name is David and I invite you to explore my personal portfolio to see firsthand how I bring ideas to life with clean, effective web design and development. Click the link below to discover more about my projects and skills!

From the age of seven, I learned how to use a PC, often surprising my parents with my early tech skills. Throughout my elementary and high school years, I was consistently the top student in my informatics classes. Initially, my passion for video games drove me to consider a career in game development. However, I soon realized that combining my hobbies with my profession could lead to a messy overlap. Instead, I decided to channel my enthusiasm for technology into web development.

Driven by this passion, I have dedicated myself to learning a variety of modern web technologies. With skills in HTML5, CSS, and JavaScript, I have expanded my knowledge to include powerful frameworks and libraries such as React, Node.js, Express, JQuery, and Bootstrap. These tools have streamlined my development process and enabled me to create dynamic, responsive web applications.

My journey from curiosity to professional aspiration has been fueled by a relentless desire to learn and grow in this ever-evolving field. I am committed to embracing new challenges and continuously improving my skills to excel as a web developer. I am eager to contribute to innovative projects and collaborate with like-minded professionals who share my enthusiasm for technology and development.

WORK EXPERIENCE

22/01/2024 – CURRENT Bucuresti, Romania

Junior Full Stack Developer PIRATECH OPERATIONS SRL

1. Design and implement modular, scalable, and highly available software components
 2. Understand the functional requirements and ensure designs are in compliance with specifications
 3. Contribute in all the phases of the development lifecycle
 4. Write well designed, testable, efficient code
 5. Ensure quality through unit, integration & e2e tests and maintain availability of deployed solutions
- Technologies used: JavaScript, HTML, CSS, Bootstrap, React, SQL(MySQL, PostgreSQL, Oracle Database), NoSQL(MongoDB, Redis), Java.

05/12/2022 – 20/01/2024

Freelancing For multiple firms

I have worked as a Freelance Web Developer and Full Stack Developer for multiple firms, where I created websites from scratch, optimized existing sites, and resolved various technical issues, including but not limited to checkout problems. In addition to web development, I handled digital advertising for a range of companies, designing impactful visuals using Canva and Photoshop. I am constantly seeking new opportunities to further develop my skills and expand my expertise.

11/12/2023 – 16/12/2023

GoIT - QA Tester Marathon

During the QA Marathon, I participated in numerous video sessions with mentors, completed various homework assignments, and engaged in practical exercises. This immersive experience provided a comprehensive understanding of what it means to be a QA Tester. The marathon lasted approximately one week and offered a thorough exploration of QA testing skills and practices.

26/10/2023 – 02/11/2023

GoIT - Code Challenge

The GoIT Code Challenge was an exciting event where participants used HTML, CSS, JavaScript, and Figma to design a personal website that served as a CV. Over the course of a week, we engaged in various activities including homeworks, informative videos, and sessions with trainers who provided guidance and feedback. At the end of the challenge, the best projects were reviewed by the mentors, and everyone had the opportunity to share opinions and insights. It was a wonderful experience where like-minded individuals came together to learn and create.

LANGUAGE SKILLS

MOTHER TONGUE(S): Romanian

Other language(s):

English

Listening B2
